

Environmental Management System (EMS)

What is EMS?

An Environmental Management System is a systematic set of processes and practices through which MARTA recognizes and manages their environmental aspects and impacts, raises employee awareness, and demonstrates our commitment to the environment. The EMS is externally certified to the ISO 14001:2015 standard as a multisite organization.

The EMS is guided by the four keys to MARTA's Environmental Policy:

-  Environmental Compliance
-  Pollution Prevention
-  Environmental Well-being of the Community
-  Continual Improvement

MARTA-wide Environmental Concerns

Bulk Fluid Management

- Major on-site fuel storage
- Chemical storage and labeling
- Spill response and reporting

Universal Waste

- Fluorescent lamp management
- Battery management

Stormwater Management

- Stormwater Pollution Prevent Plans (SWPP)

Wash Water Recycling

- Bus and rail wash systems

Air Compliance

- CNG facilities
- Emergency generators

Waste Minimization / Recycling

- Single stream and material specific recycling
- Electronic waste
